TODAY,
THE
FOUR
OF US...

7Q. Did you base CRASH off any actual idols?

A. I've been getting this question a lot lately! Or rather, the most popular question is "Did you start CRASH because you like a certain idol group?" But actually, I didn't have any models for CRASH!

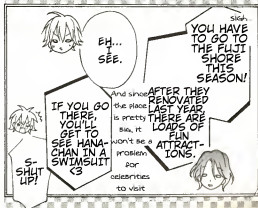

Other questions were "Was it the new group LIEN?" or "Was it Hey! Say! Jump?" Looking at those questions, many readers think their own favorite group was the model for CRASH. How interesting...!

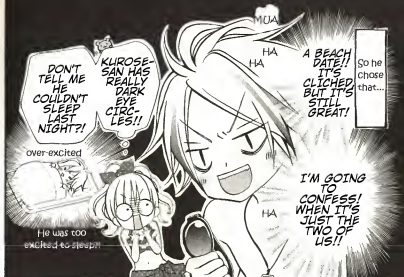

I'm also asked if I started CRASH because of my love for idols, but I think it's more correct to say that I started CRASH because there are many idol fans right now~

I've said this before, but the 5 members of CRASH were actually characters born from other works, though I didn't create them as a special group at first.

So if everyone can imagine CRASH as their favorite idols, and fully enjoy my work, I'll be really happy!

Of course, if you all support CRASH as CRASH, I'll be very happy too :)

SO HE

8 Q. Why did the main character change from Hana to Yui?

A. This is also a very popular question! Firstly, if Hana was still the main character, a second part wouldn't have been created. Hana and CRASH's story actually finished in Volume 7. For my next work, I originally intended to challenge a completely different genre.

At that time, I got a suggestion from my editors' office. They asked me if I could continue CRASH with a new main character as the focus, and after hearing that, I started to have an image of that character in my head... That's why I decided to create part 2 of CRASH eventually.

Because Yui exists, CRASH and Hana have been able to reappear in front of all readers' eyes~

I also received a letter like this: "At first I didn't like that the main character changed, but now I like both Yui and Hana". Thank you!

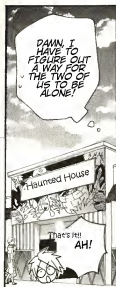

Yui, Hana and the 5 members of CRASH, I'll keep drawing my best, so please support me, everyone!

Also, please expect many side characters to appear more!!

The author's notes will end here!

If you have any questions or letters for me, send them to my address~

You used
